FAX

FAX SCANNED DOCUMENTS **SIMPLY** AND **SECURELY.**

ELIMINATE TIME-CONSUMING MANUAL FAXING

KYOCERA'S ACCUSENDER FAX ENABLES USERS TO **EASILY SEND** SCANNED DOCUMENTS OF ANY SIZE VIA **SECURE FAX** FROM SELECT KYOCERA MFPS

Despite the increased use of digital technology, vertical markets such as healthcare, manufacturing and financial services are still heavily dependent upon fax technology as part of their processes. While fax is a necessary requirement, standalone equipment and supplies are costly, and the transmission process is time-consuming. Moving from manual faxing to an e-mail fax solution represents one of the most cost-effective, productivity-enhancing improvements available to organizations in fax-intensive industries.

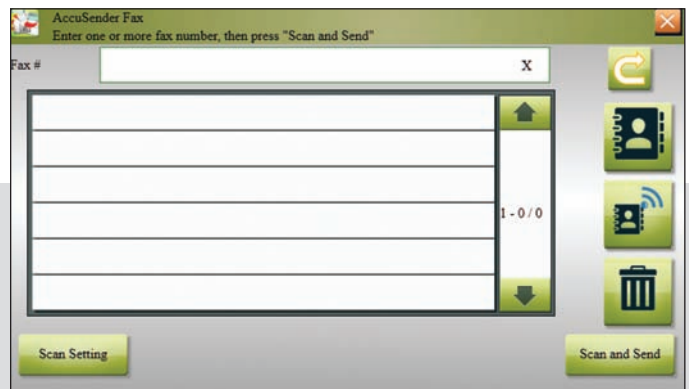

KYOCERA's AccuSender Fax is a business application that enables users to send scanned documents as faxes directly from your KYOCERA MFP. Through integration with most popular fax servers on the market, users simply scan a hardcopy document or select one from stored archives, configure it as an attachment to an e-mail message, and use the recipient's fax number as the e-mail address. The fax server translates the attachment, which is then processed as an incoming fax by the recipient's fax machine.

AccuSender Fax is a simple, cost-effective way to add increased functionality to your KYOCERA MFP as well as eliminate the security risks associated with stand-alone fax machines and insecure e-mail communications.

WITH KYOCERA ACCUSENDER FAX, SENDING FAX FILES IS FAST AND EASY!

- › Configure sending preferences on the MFP's control panel
- › Enter the recipient's fax number as the destination address
- › Scan and send your documents

It's that simple!

Users can add destinations manually by entering the number at the MFP keypad

HYPAS

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

AccuSender Fax offers many user defined scan options

AccuSender Fax address box capability allows faxing to multiple destinations with ease

ACCUSENDER FAX BENEFITS

Organizations face increasing pressure to improve employee productivity and reduce operating costs. Regardless of the size of your business, the AccuSender Fax application meets these challenges by integration with your organization's existing fax and document distribution applications.

- › Seamless integration with line of business applications
- › Increased compliance by retaining a full audit trail and archiving of all sent fax communication
- › Lower costs by reducing paper, phone lines, modems, stand alone fax machines and related supplies
- › Aid with compliance by providing a secure place for managing document distribution and delivery
- › Reduction in the need for time-consuming manual faxing

SYSTEM REQUIREMENTS

- › LDAP Authentication protocols supported: NTLM v2 and Kerberos
