

KYOCERA
OPENTEXT
ALCHEMY
CONNECTOR

POWER YOUR DOCUMENT MANAGEMENT.

A DIRECT LINK TO A DIGITAL FILING CABINET.

AUTOMATE YOUR DOCUMENT DRIVEN BUSINESS PROCESSES TO HELP LOWER COSTS AND IMPROVE OPERATIONAL EFFICIENCY.

Today's businesses are continually challenged to locate and move information more quickly, seamlessly, and securely within the organization. OpenText Alchemy is one such system that facilitates the document management process by creating a 'digital filing cabinet' of business-critical communications and records that can be accessed and utilized as needed.

Now, companies can leverage their KYOCERA MFP as a powerful on-ramp into their Alchemy system, with KYOCERA's OpenText Alchemy Connector. Users can easily convert paper documents to digital files, where they can be imported into Alchemy without any special middleware or server add-ons. This seamless, direct link facilitates the ability to perform activities across all aspects of a document's life cycle: capture, store, share, revise, retain or dispose. It's one more way KYOCERA is working to boost productivity, foster collaboration, and accelerate access to information, while maximizing your hardware investment.

HOW IT WORKS

From the KYOCERA MFP interface, the user chooses the Alchemy folder from the touch screen control panel, and then enters the required index fields before scanning the document. Once scanned, the digitized files are readily accessible to Alchemy users with proper credentials, where they can take full advantage of Alchemy's document capabilities and functionalities.

Streamline and automate document processing across your business while creating a controlled environment for document storage with KYOCERA OpenText Alchemy Connector.

> Leverage your existing OpenText Alchemy investment

- > Accelerate document access and process efficiency across the business
- > Improve process transparency and adherence to regulatory requirements
- > Reduce the cost of hardcopy storage

KYOCERA OPENTEXT ALCHEMY CONNECTOR

HyPAS®

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

The Alchemy Connector enables you to quickly capture and index hardcopy documents from the KYOCERA MFP

Scan to your OpenText Alchemy folders directly from the MFP control panel

KYOCERA OPENTEXT ALCHEMY CONNECTOR BENEFITS

- › Leverage your existing Alchemy investment with additional functionality from HyPAS-enabled KYOCERA MFPs
- › Simplify delivery of documents to customers, colleagues, business partners and auditors
- › Assist in compliance with industry regulations and standards by creating a controlled and auditable environment for document storage
- › Increase productivity by enabling users to share and revise documents electronically
- › Quick and easy document capture and indexing from the KYOCERA MFP
- › Accelerate document-intensive operations by integrating document access into your existing line of business systems
