

KYOCERA
PANELPLUS™

YOUR PANEL YOUR WAY.

CUSTOMIZE THE SCAN AND COPY FUNCTION TO MIRROR YOUR WORKFLOW.

PANELPLUS REDUCES AND SIMPLIFIES COMPLEX SCAN AND COPY JOBS, ENABLING OFFICE STAFF TO FOCUS ON MORE IMPORTANT TASKS.

There is great diversity in the way businesses are run. The processes of one company can be significantly different from those of another. The same is true for document workflows, therefore preset processes may not be the most efficient way for a business to utilize its MFPs.

When it comes to scanning and copying, KYOCERA's PanelPlus puts you in control by configuring the MFP's scanning and copying features to simplify your document workflow. Boost efficiency and productivity by choosing only the settings you need to see. Minimizing the necessity to select special features will help streamline time spent at the MFP. It's your panel, organized your way.

HOW IT WORKS

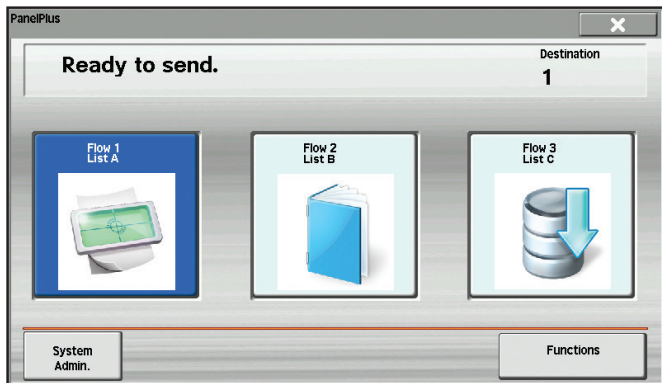

With the PanelPlus™ business application, your authorized KYOCERA dealer can easily customize scanning and copying features right on the control panel of your MFP to maximize your organization's document imaging efficiency. Selected settings are stored as customized one-touch options based on specific user needs. The flows are created on a computer by your authorized KYOCERA dealer and then imported into the MFP so they are easily accessible from the touch screen control panel.

PanelPlus provides a quick and easy means of performing scan operations. Task-focused, pre-programmed "one-touch" buttons facilitate copying, scan to e-mail, scan to SMB (PC) or scan to FTP destinations, creating a more streamlined and efficient environment.

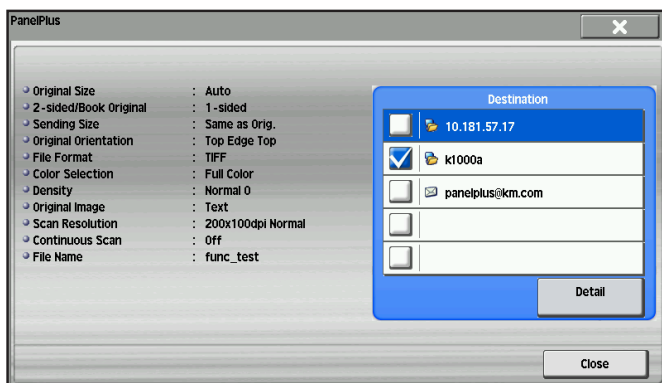

- › Streamlines Complex Scan and Copy Tasks
- › Customizable Based on User Requirements
- › Automated Processes Help Reduce Human Error

HyPAS®

KYOCERA's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.

Sending documents is a simple “one-touch” using stored settings

Pre-determined settings for each “flow” are shown on the left while users can choose multiple destinations for each job on the right

PANELPLUS BENEFITS

- > Scan and copy settings that your organization needs are displayed
- > Reduces and simplifies complex scanning and copying tasks
- > Destinations and settings are pre-defined for greater efficiency and error reduction
- > Scan tasks can be customized as needed based on user's copy requirements
- > One-touch buttons can be pre-programmed for a streamlined environment
- > Compatible with all HyPAS-enabled and capable KYOCERA MFPs

SYSTEM REQUIREMENTS

- > Supported OS - Windows® XP SP3, Windows Vista® SP2, Windows® 7 SP1, Windows® 8
- > CPU - Intel® Core™ 2 P8700 or better recommended
- > Hard Disk Space - Minimum 300 MB available
- > RAM - 512 MB of built-in memory should be available for this system
- > External Storage Media - Support for USB memory required
- > Supported Browser - Internet Explorer® 7, 8, 9 or 10
- > Supported Java Version - JRE version 7
