

HIGHLIGHTS

Maximize productivity by leveraging your existing Microsoft® SharePoint investment with advanced functionality from select Kyocera MFPs

Increase return-on-investment by moving paper-intensive environments to efficient digital workflow, reducing operating expenses and overhead

Utilize your existing SharePoint folder structure to index and scan documents for instant sharing

Ensure greater efficiency and accountability by providing an audit trail for documents that were traditionally stored in hard copy format

Retrieve and print documents stored in your SharePoint document library directly from the MFP control panel

Offer enterprise-wide access to information, with support for multiple SharePoint servers

MAKE WORKGROUP COLLABORATION EASY

Microsoft SharePoint® is a popular server-based document management solution that enables organizations of all sizes to seamlessly collaborate with electronic documents. With 24/7 access, authorized users can browse their secure SharePoint Document Library from any network PC, simplifying document sharing and making it easy for people to work together.

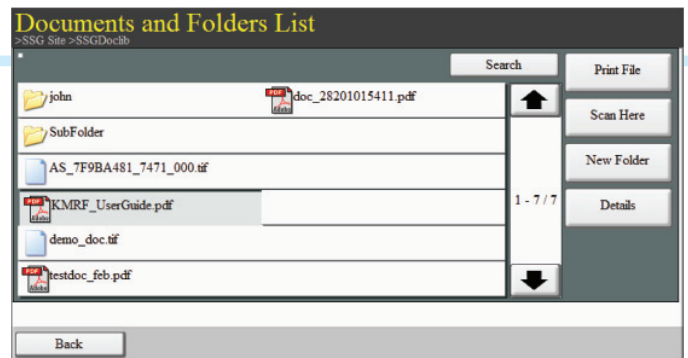

To leverage your investment in your existing IT infrastructure, and enable you to maximize workgroup productivity, Kyocera's SharePoint Connector for Enterprise offers an intuitive Scan-to-SharePoint feature. Without any special middleware or server add-ons, the HyPAS-enabled Kyocera MFP becomes a high speed on-ramp for the conversion of paper documents into easily-shared digital files. Most importantly, the connector establishes a direct link with your existing SharePoint Document Libraries.

HOW IT WORKS

At the Kyocera MFP, the user places the document on the document feeder, selects a SharePoint folder from the touch screen panel, and then enters/selects the required index fields. Once scanned, the digitized files are accessible to team members – around the corner or around the globe – right from their PC. Not only can users easily archive and share documents, it is also possible to quickly retrieve documents from a SharePoint document library and print them at the MFP, for a time-saving, on-demand printing solution. For Windows environments, your enterprise can create editable file types such as PDF, Word and Excel using the optional Optical Character Recognition powered by OmniPage® OCR. Its robust capability lets you fully extract content while preserving the format of each element, whether it is text, image or spreadsheet, thus saving you time and increasing productivity.

IMMEDIATE ACCESS WHEN YOUR BUSINESS DEMANDS

Mission-critical sales presentations, advertising campaign materials, new product launch plans, and many other documents are meant to be shared; delays are not an option. So in today's fast-paced, competitive business world, people must have timely access to information. With Kyocera's SharePoint Connector you have an enterprise-wide conduit to SharePoint, one that facilitates the flow of vital information – the information that powers your business.

View of existing documents and folders on the MFP control panel

HyPAS™

Kyocera's HyPAS (Hybrid Platform for Advanced Solutions) is a powerful and scalable software solution platform. Through direct enhancement of the MFP's core capabilities, to the integration with widely accepted software applications, HyPAS will enhance your specific document imaging needs, resulting in improved information sharing, resource optimization and document workflows.
